Project Proposals

MIRJANA ARSENOSKA

AI Project Ideas

Three ideas. Three real everyday problems.

1

LockIn

Personal AI Study Assistant

2

CookUp

Personalized Meal Planner

3

MapOut

Complete AI Travel Planner

LockIn

Personal AI Study Assistant

Turn your study materials into organized notes, quizzes and a personalized study plan – so you can learn smarter, not harder.

Upload & Organize
Add PDFs, notes or photos and keep everything in one place.

Understand & Summarize
Get clear, structured notes from your lectures.

Practice & Learn
Generate quizzes and flashcards from your material.

Plan & Improve
Get a personalized study schedule based on your goals and progress.

LockIn Project Canvas

1

Title

LockIn

2

Target Users

High school students, university students, and independent learners.

3

Problem

Scattered study materials, time-consuming organization, and difficulty identifying what to study.

4

Why it matters

Reduces study stress, saves time, and helps students focus on weak topics.

5

Input

PDFs, lecture notes, photos, course names, exam dates, and quiz answers.

6

Output

Organized summaries, quizzes, flashcards, personalized study plans, and progress recommendations.

7

AI capability

OCR, NLP summarization, text classification, question generation, and adaptive recommendations.

8

Data

Student-provided course materials, topic information, exam deadlines, and quiz performance.

9

Success Criteria

Accurate text extraction, reliable summaries, relevant questions, and useful study recommendations.

CookUp

Personalized Meal Planner

Get personalized recipes and meal plans based on your budget, ingredients and preferences – so you can eat well, save money and waste less.

Find Recipes
Get recipe ideas based on your ingredients, preferences and dietary restrictions.

Reduce Food Waste
Use what you have and turn ingredients into delicious meals.

Stay on Budget
Get cost estimates and budget-friendly alternatives.

Plan & Organize
Create weekly meal plans and automatic shopping lists.

CookUp Project Canvas

1

Title

CookUp

2

Target Users

Students, individuals, families, and households.

3

Problem

Difficulty planning meals, managing food costs, and avoiding waste.

4

Why it matters

Saves time, controls spending, and reduces food waste.

5

Input

Budget, ingredients, preferences, allergies, and cooking time.

6

Output

Personalized recipes, weekly meal plans, shopping lists, and cost estimates.

7

AI capability

Recommendation systems, ingredient matching, constraint satisfaction, and optimization.

8

Data

Recipe datasets, ingredients, cooking instructions, and estimated local food prices.

9

Success Criteria

Relevant recipes, budget-friendly plans, allergy exclusion, and accurate shopping lists.

MapOut

Complete AI Travel Planner

Plan your perfect trip with personalized itineraries based on your destination, budget, interests, and travel dates – so you can explore more, save time, and travel smarter.

Discover & Explore
Find destinations and activities that match your interests.

Plan & Organize
Create personalized itineraries with activities and routes.

Stay on Budget
Get cost estimates for hotels, transport, food, and activities.

Travel Smarter
Get weather-based suggestions, optimized routes, and packing tips.

MapOut Project Canvas

1

Title

MapOut

2

Target Users

Students, solo travelers, couples, families, and tourists.

3

Problem

Trip planning requires coordinating hotels, transport, activities, costs, and weather.

4

Why it matters

Saves planning time, manages budgets, and avoids unrealistic schedules.

5

Input

Destination, dates, budget, travelers, interests, and preferences.

6

Output

Personalized itineraries, travel suggestions, cost estimates, and packing lists.

7

AI capability

Recommendation systems, planning algorithms, route optimization, and constraint satisfaction.

8

Data

OpenStreetMap, Open-Meteo weather data, and estimated travel prices.

9

Success Criteria

Budget-friendly itineraries, relevant attractions, realistic schedules, and accurate cost estimates.

Project Comparison

Three ideas. Three different solutions.

LockIn

Solves disorganized studying.

CookUp

Solves difficult meal planning.

MapOut

Solves complicated trip planning.

Thank you!
